

Profile

I bring four years of experience as a Front-End Developer, specializing in cross-browser web development, hybrid app development, and maintaining clean code practices. I consistently prioritize precision and optimal performance when crafting website interfaces. My passion extends to continually learning new languages and technologies to stay at the forefront of the rapidly evolving tech landscape.

Skills	Programming	HTML, CSS, SCSS, JavaScript, TypeScript
	Frameworks, Libraries	Angular, ReactJs, JQuery, Webpack, Vite
	Other technologies	Docker, Git

Experience

OFFSPRING DIGITAL

FRONT-END DEVELOPER

06/2021 - Present

- Responsible for developing user interface features for the web application using Angular, with a focus on functionalities tailored for users to seamlessly view educational videos.
- Recreate the payment and class booking workflow from the existing website into a modular format that can be easily integrated into any website using ReactJS. This facilitates the streamlined use of shared logic for both applications and web platforms.
- Compose unit tests for the application using Cypress to ensure smooth execution of application workflows with each deployment.
- Additionally, develop a set of small modules such as login and password recovery to ensure shared functionality across various web applications.

Technologies: Angular 8 (Ngrx, Material UI, Rxjs state management), ReactJs (Redux, Context management, React-hook form), Javascript, Webpack, Vite, Cypress.

DEHA SOFTWARE

FRONT-END DEVELOPER

01/2019 - 06/2021

- Provided insights on technology selection and directed the development of a user management application using Angular and Laravel, along with establishing a staging environment for the application on AWS services, catering specifically to Japanese clients.
- Optimized the performance of the application that utilizes maps and draws routes between various locations.
- Additionally, gained experience in developing cross-platform applications using Angular and Cordova for building purposes.

Technologies: Angular 6 (Ngrx, Bootstrap), ReactJs (Redux, Material UI), Laravel, Cordova.

Work as internship C++ in FPT Software

Education

Hanoi University of Science and Technology (09/2015 - 06/2019)
Major: Electronics and Communication

Hobbies

Cafe, Running
